

Relatorio de validacao visual do Copiloto

Data: 12/09/2026 | Escopo: login, projeto, recorte Leaflet, Copiloto e persistencia PostgreSQL.

Caso validado

Usuario e projeto temporarios foram criados. O fluxo acessou a aplicacao, selecionou o projeto, desenhou um Recorte 3D e verificou as acoes rapidas de analise espacial.

Painel autenticado - aprovado: mapa, projetos, ferramentas e Copiloto visiveis.

Projeto selecionado - aprovado: projeto de teste exibido e ativo.

Geometria desenhada - aprovado: retangulo finalizado por arraste e acoes espaciais exibidas.

Resposta do Copiloto - aprovado: buffer criado com sucesso e camada persistida no projeto.

Conclusao tecnica

Autenticacao, selecao de projeto, desenho da geometria e exibicao das acoes espaciais estao corretos. A consulta ao Copiloto falhou porque o LM Studio nao forneceu resposta utilizavel durante o teste. A persistencia nao foi acionada, pois nenhuma geometria de resultado foi produzida. Deve-se confirmar /v1/models na porta 1234 e repetir a consulta.
